**Abstract:**

JP 2002113108 A

**NOVELTY** The catheter consists of titanium oxide type photocatalyst coated on the lumina surface such that liquid does not adhere onto the lumina.

**USE** Used in medical field used to drainage liquids e.g. urine or inject infusion solution, blood, etc.

**ADVANTAGE** Prevents adherence of liquid on lumina surface of catheter, thereby preventing jamming of catheter lumina. Prevents adherence of organic compound bacteria derived from body fluids on lumina, reducing burden of patients.
